DELTA DENTAL®

Don't Break a Date With Your Dentist!

Regular dental visits can prevent many oral health problems or help identify them earlier when treatment may be simpler and more affordable.[1] In fact, every dollar you spend on preventive care may save you money later in restorative care and emergency procedures.[2]

100%

Remember that exams and cleanings are FULLY COVERED when you see an in-network dentist.

So brush, floss and see your dentist regularly to help maintain a healthy smile!

If you need additional care, seeing an in-network dentist helps keep your wallet healthy, too! And when you see a dentist in the Delta Dental PPO™ network, you'll have even smaller out-of-pocket costs.

Nationwide, four out of five dentists are part of Delta Dental networks, which means members have many choices nearby.

To find a dentist in your area, use the online dentist search tool, or call customer service at 800-524-0149 (TTY users call 711).

A healthy smile and healthier you are just around the corner!
